PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on experience in SQL, Python, and Power BI, skilled at turning raw data into actionable business insights through exploratory data analysis, KPI tracking, and interactive dashboard reporting. Experienced in statistical modeling, customer segmentation, and predictive analytics, with a track record of building end-to-end analytics projects from data cleaning through stakeholder-ready visual reports.

CORE SKILLS

Data Analysis & BI: SQL (MySQL), Power BI, DAX, Excel, Exploratory Data Analysis (EDA), Data Mining, Data Storytelling, KPI Reporting, Dashboard Development

Statistical & Predictive Analysis: Statistical Modeling, Predictive Analytics, Customer Segmentation (RFM), Regression & Classification Models

Programming & Tools: Python (Pandas, NumPy, Scikit-learn), SQL, Git/GitHub, Streamlit

Additional: Deep Learning (LSTM/GRU), Generative AI (Prompt Engineering, RAG)

TECHNICAL PROJECTS

Business Intelligence & Power BI Dashboards

- Credit Card Analytics Dashboard:** Built an interactive Power BI dashboard tracking credit card usage metrics, default rates, and transaction volumes using advanced DAX calculations.
- Amazon Sales Dashboard:** Analyzed and visualized large e-commerce datasets in Power BI to identify top-performing product categories, regional sales trends, and seasonal revenue spikes.
- HR Analytics Dashboard:** Developed a workforce tracking dashboard analyzing employee attrition, retention rates, and demographic performance through dynamic KPI visual reports.
- Paralympics Dataset Analysis:** Cleaned and visualized historical sports data, mapping global performance metrics into a story-driven Power BI report.

Data Analysis & Statistical Modeling (Python)

- Customer Lifetime Value (CLV) & Segmentation Analysis:** Performed RFM segmentation and statistical modeling on 5,878 customers (\$17.74M revenue) using Gradient Boosting, reaching 97.45% model accuracy; found the top 20% of customers generated 77.2% of total revenue, informing targeted retention strategy.
- Fraud Detection System:** Built and evaluated a classification model (XGBoost with SMOTE) to flag fraudulent transactions in a 6.3M+ record imbalanced dataset, achieving 99.98% AUC and 98.7% Recall through careful preprocessing and imbalanced-data handling.

AI-Driven Data Solutions (Supplementary)

- Veda AI (Automated Grading System):** Built a multimodal Generative AI tool (Google Gemini Vision API) to process and structure handwritten response data at scale.
- Hybrid Sales Forecasting Model:** Processed 10 years of financial time-series data using an LSTM/GRU architecture for trend forecasting and residual error correction.

EXPERIENCE & INTERNSHIPS

Data Analytics Intern — Zeetheta (Remote)	Aug 2026
Data Analyst Intern — NextGen Technohub (Remote)	Mar 2026 – Jun 2026
Data Analytics Intern — Unified Mentor (Remote)	Mar 2026 – Jun 2026
Data Analyst Intern — Codec (Remote)	Nov 2025 – Dec 2025
Machine Learning Intern — Prodigy (Remote)	Aug 2025

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science and Engineering — University of Kalyani | CGPA: 7.23/10 | 2023–2026

Diploma in Computer Science & Technology — State Council | CGPA: 8.0/10 | 2020–2023

IBM Data Analyst Professional Certificate — Coursera/IBM (Ongoing)

Introduction to Data Analytics — Coursera (Jul 2026)

IBM Excel for Data Analysis — Coursera/IBM (Jul 2026)
